

Annual Report

COMMUNITY COALITION FOR

HAI+I

Accomplishments and Highlights from 2017

15,570 patients served at CCH's primary care, physical therapy, and surgical clinics

233 volunteers traveled to Haiti as part of **23** teams and transformed lives in person

72 Haitian health-care professionals trained, plus **200** student nurses rotated through our primary care clinic for hands-on experience

11,800 families served through cholera prevention training in rural communities; based on average household size, that's **70,800+** people!

94 teachers and principals mentored by US education volunteers

90¢ of every dollar raised supported programs (not overhead)

First honey harvest from community beehives (3.75 liters)

25 girls joined a weekly soccer program to empower girls

CCH named as a 2017-2018 National Capital Presbytery Mission Highlight partner

I have come to appreciate the Haitian people's generous and welcoming hearts and can't help but be amazed at their friendly and joyous spirits."

- Morgan Carson, Volunteer

1,400+ volunteer hours spent improving education in our partner schools

Dr. Francois, Kenson and his dad.

Kenson's parents knew he was different from other children because he would sometimes collapse when playing at recess or at home, but they didn't know why. Kenson's father is a street merchant who earns about \$3 (USD) per day. Without CCH's financial support of his school, Kenson's family wouldn't be able to afford the tuition.

This past school year, CCH piloted a wellness program at partner schools where our mobile clinic provided health check-ups for students.

It was at one of these wellness clinics where CCH Lead Physician, Dr. Francois, discovered Kenson's heart condition. Knowing that CCH would not have the doctors and equipment that Kenson needed, CCH began contacting other health organizations in Haiti, and the Haiti Cardiac Alliance stepped up and took Kenson's case. We are pleased to report that Kenson got the surgery he needed and is back at school feeling much better!

64 patients received free dental procedures. **360** students received dental screenings. **200** students received fluoride treatments. But the waitlist for dental needs is still long!

175,000+ low/no cost prescription and OTC medications distributed to CCH patients and our 25

referring partner clinics

23 educators trained at Matenwa Learning Center and Haiti Partners professional development seminars (Haitians training Haitians)

Nearly **500** students served by school-based health clinics 3 times per year. **50** children received referrals for additional medical care

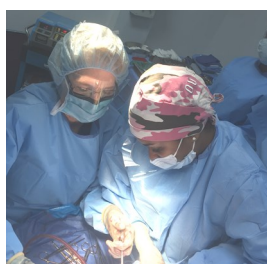

First operating ventilators in Southeast Haiti installed at CCH's Jim Wilmot Surgical Center

170 young women received Days for Girls hygiene kits and reproductive health education

8 partner schools, including 2 new partners: Tati Fofo Preschool and AFDCS.

200 no-cost pap tests performed for cervical cancer screening

First

uterine embolization surgeries in all of Haiti

CCH's first ophthalmologist volunteer helped screen **322** students for vision problems. **5** received eyeglasses, and **14** were referred for additional vision care

90% harvest rate from community gardens. New crops this year included eggplant, tomatoes, lima beans and hot peppers)

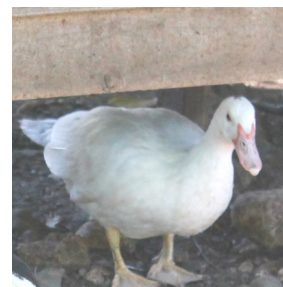

Genel, a leadership development trainee, came to me to thank CCH. He said he used the training he received from CCH to train some of the young leaders in his hometown of Pignon.

- Nazaire Leveillé, Community Development Liaison at CCH

New leadership development program kicked off with **39** people joining the first cohort of community leaders-in-training

200+ animals distributed in community livestock program (ducks, new in 2017)

Your support makes a difference! Help us do even more in 2018.
